BULL CREEK

## Girls make healthy living fun

A MOBILE app that looks like a game but doubles as a guide to healthy living has won a team of Year 6 girls from All Saints' College the WA Tech Girls are Superheroes competition.

Stella Hermawan, Adeolu Adeoye, Ayona Basu and Riya Singh designed the app to address the problem of poor nutrition and obesity by encouraging users to be active.

"Our app helps keep kids healthy while they think that they are playing a game," Stella said.

"It is unique because it has an emoji feature that the person using the app will have to look after.

"The aim is to keep healthy by being

happy, exercising, connecting with friends and practising mindfulness.

"To motivate the consumer to do

this we have prizes like unicorn horns as accessories for the emoji.

"We figured out that if we made our app look like a game but have self-benefits too, it was a win-win situation."

The Tech Girls are Superheroes competition is a nationwide initiative to encourage more girls into STEM careers, with entries required to address one or more of the UN's Millennium Development Goals.

All Saints' College junior school ICT teacher Brette Lockyer encouraged the students to enter the competition and said it offered young girls the chance to push boundaries.
