

**ALL SAINTS'  
COLLEGE**

Tuesday, 13 March 2018, The Melville Times, page 30

## GOING BEYOND BOUNDARIES

We know that today's parents aren't simply choosing a school. They are looking for a partner to help their young person navigate the uncertainty of tomorrow and be prepared for whatever might lie beyond. All Saints' College understands this and is proud to have launched the Beyond Boundaries Institute which helps foster future-enabled young people capable of transcending life's many boundaries.

### ALL SAINTS' COLLEGE

FOSTERING future-enabled young people who are capable of transcending life's many boundaries is the core purpose of Djoowak: The Beyond Boundaries Institute (BBI), launched earlier this year at All Saints' College.

BBI brings together universities, industry, corporate leaders, communities and families to create an ecosystem in which students can innovate, experiment, flourish and thrive.

Recognising there is no one pathway to a tertiary education or to a range of futures, BBI aims to prepare students not just for exams but for a fulfilling life, ensuring that they are interacting and learning in local, national and global contexts.

Supported by internationally acclaimed education transformer Professor Yong Zhao, who is a founding member of the BBI's advisory group, the institute is future-focused and dedicated to innovation and leadership in educational practices.

"All Saints' students have a wonderful opportunity – the school is on the cutting edge with innovation and entrepreneurship," Prof Zhao said.

For more information about the BBI and All Saints' College, visit [allsaints.wa.edu.au](http://allsaints.wa.edu.au).
